

Arlon pioneered the use of pressure-sensitive adhesives in the manufacture of quality windows and doors. For over 20 years, we have been protecting most families' largest investment and the reputations of manufacturers throughout North America.

Today, Arlon glazing tapes protect over \$30 billion of windows installed in homes throughout the USA and Canada.

Arlon created the first glazing tape made with durable cross-linked polyethylene foam and specialized, highly weatherable adhesives. In the process, we set a new standard of performance for the industry — a tradition that continues today. When selecting a product to protect your windows — turn to a name you can trust — Arlon.

Arlon Glazing Tapes

Arlon offers a variety of glazing tapes to meet your specific needs and preferences. Each has undergone years of development and field trials to ensure that you get the reliability expected from an "Arlon Glazing Tape." HiPerGlaze™, the newest glazing tape, is being introduced only after two years of development and testing. Arlon backs up its proven track record with the strongest in-field warranty in the industry. For security, all you need to do is look for "Arlon Glazing Tape" printed inside the core.

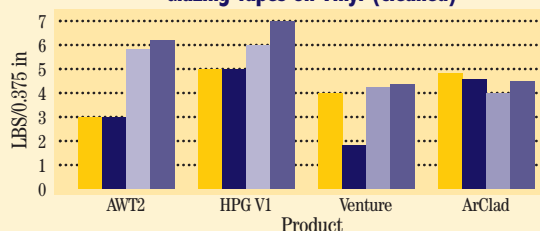

Glazing tapes remain the preferred means for sealing windows in most manufacturing environments. Compared with "wet" sealants, tapes provide —

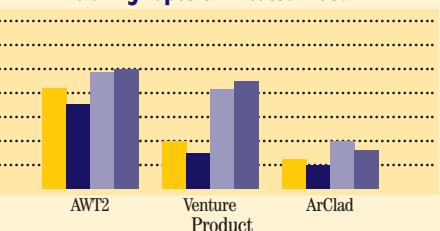

- Instant adhesion & Green strength — allows immediate shipment
- Efficient hand application — provides manufacturing flexibility
- Consistent sealant thickness — ensures a watertight seal without excess sealant "ooze"
- A cleaner working environment — eliminates silicone contamination of factory floor, employees' clothes
- A high quality, secure seal with no capital investment

In the laboratory and in the field, Arlon has evaluated the initial and long-term performance of our tapes. Arlon's AWT2 and HiPerGlaze™ tapes have been thoroughly tested and shown to outperform any other glazing tape. Because of our confidence in our quality, we are able to offer you the best warranty in the industry.
