**Arlon Announces the Launch of DPF 6100XLP at ISA 2016**

**Placentia, California – April 19, 2016** – Arlon is excited to officially launch our new Cast Wrap Film, DPF 6100XLP as an addition to our automotive print media product line at ISA 2016. DPF 6100XLP has a smooth finish and low profile air egress liner making it a great solution for your commercial vehicle wrap needs. The most notable feature of DPF 6100XLP is its superior bond in channels and compound curves, outperforming other alternative films in the market.

DPF 6100XLP's low initial tack makes it highly repositionable, accelerating the installation time of completing a job. Additional features of DPF 6100XLP include its compatibility to various print systems including Latex, Solvent, Eco-Solvent and UV printers. Recommended applications for DPF 6100XLP are full vehicle wraps, partial vehicle wraps, fleet wraps and various other applications.

"Successful wrap projects are created by balancing efficient installation with good durability," states Chad Russell, Vice President of Sales, Arlon Graphics, LLC. "Arlon DPF 6100XLP offers easier repositioning without sacrificing the final bond."

**About Arlon Graphics:**

Arlon Graphics, LLC, manufactures and markets a full line of high quality pressure sensitive cut vinyl, flexible substrates, and print media films for the digital imaging, signage, screen printing, vehicle graphic and automotive restyling industries. Arlon is headquartered in Placentia, CA, with strategically positioned distribution out of Australia, Europe, Latin America, the UK and Uruguay to service our customers worldwide.
