

DPF 6000XRP & SERIES 3220 OVERLAMINATE

“ We chose Arlon DPF 6000XRP for the media as the print quality was exceptional on the HP Latex L26500 printer and the overlamine gave a **rich glossy look** that we were trying to achieve. Also **the products were very competitively priced against the competition**. We use **DPF 6000XRP for full and partial wraps, mainly for vehicles with soft curves**, such as Vivaro’s, Renault Traffics and other light vans. We have also used it on our own Andean Signs vehicle. We’re extremely happy with the product and have had no issues since using the material since 2011. ”

Andy Gosling

Vehicle: Two brand new Seat Leons supplied by PHVC Leasing
Material: 21.3 yards of both DPF 6000XRP and Series 3220 Overlamine
Printer: HP Latex L26500
