DPF 6700 WITH SERIES 3220 LUSTER OVERLAMINATE

“ I was looking for a vinyl with a very aggressive adhesive that would conform to a rough surface, and that I thought we could get several years out of since our site gets very little sun. I looked at a lot of options from various suppliers and spoke to an Arlon rep about the DPF 8000 and DPF 6700. We pull tested both at the soccer wall. The DPF 6700 went on very well with heat – and stuck to the wall well. I was one of the installers on site and I was very impressed on how easy the material was to install with the use of heat and rough surface application tools. ”
